

# Are You or a Loved One Living With **PARKINSON'S DISEASE?**

**A Study is Looking At  
a New Investigational  
Medication That  
Could Improve the  
Lives of People  
with Parkinson's Disease.**

**You may be eligible to participate if:**

- You were diagnosed with Parkinson's disease in the last 7 years
- You are between the ages of 35 and 80 years old

**What is involved in participation?**

- A genetic screening to determine if you qualify for the study (which requires a GBA1 gene mutation)
- If you qualify: You will be invited into the second part of the study, which will include different tests and assessments, and potentially taking the new medication

**Participation is voluntary**

It is entirely up to you whether you take part or not. If you agree to take part, you are still free to withdraw from the study at any time, for any reason or even without providing a reason, without penalty or loss of benefits to which you are otherwise entitled.

**Why participate?**

Participation in this clinical study is very important - It may advance the knowledge of Parkinson's disease!

While there may be no benefit to you, this research may benefit others in the future.

**If you are interested in participation in this study please contact:**
